

Schedule B List of data products and data order schedule (2013-2014)

Schedule B is a list of upcoming data orders

This Schedule B lists data products that the Community Data Program intends to acquire during the 2013-2014 program year (April 1, 2013 through March 31, 2014). Schedule B contains a list of data products - including both data tables and analytical tools - the names of data product providers, a summary of available geographies, and the data delivery schedule, reflected in the following tables. All products currently under consideration for acquisition are described in greater detail in the *Community Data Catalogue 2012-2017* spreadsheet (communitydata.ca/resources).

Making data available takes time

While certain products will be available within weeks of purchase, the special/custom orders from Statistics Canada and other providers may take up to 12 months for delivery.

Schedule B is updated regularly

This document is amended regularly, subject to the availability and cost of data. Priorities for data product acquisition are identified by the Data Access and Purchase Working Group with input from Leads and are approved by the Community Data Program Steering Committee, using a decision making process consistent with the Community Data Program *Governance Structure and Operating Procedures* (communitydata.ca/resources). If you have questions about this process, please speak to your local Consortium Lead.
