**Community Data Program**  
CCSD's flagship initiative

Source: Statistics Canada, 2016 Labour Force Survey; 2016 Census of Population; 2015 T1FF Family File, Custom Order. Note: The definition of working poverty includes people between the ages of 18 and 65 living independently and earning more than \$3,000 but less than the low income measure (LIM), defined as 50 per cent of the median income. The category excludes students. The Community Profile series is produced by the Canadian Council on Social Development (ccsd.ca) using data available from its Community Data Program (communitydata.ca)
