The files contain only geographic boundary data for use with GIS software. Please note that these files may not be the same data that are used locally. All Statistics Canada geographies are available (e.g., CSD, Census Tract, Dissemination Area, as well as the Road Network (names with address ranges).

² City of Toronto will provide polygon files for the City's 140 Neighbourhoods

7) SMALL AREA & ADMINISTRATIVE DATA (SAAD) – “TAXFILER DATA”
(annual data – 2006 through to 2010)
by Canada, Provinces/Territories, Federal Electoral Districts, Census Metropolitan Area, City, and Forward Sortation Areas

From the income tax forms submitted each year by Canadians, the Small Area & Administrative Data Division produces a wealth of economic and demographic information for use by both the private and public sectors. Commonly referred to as “taxfiler data”, over 20 million records are processed each year to provide the most detailed and accurate data possible. In fact, the information represents approximately 96% of the Canadian population. These data are matched to a number of geographic files giving clients the opportunity to request data for areas as small as a letter carrier’s walk. Sample extract from the Family Data Bank:

10) LABOUR FORCE HISTORIC REVIEW (annual data – 2007 through to 2011)

All Tables will be available for Canada & Provinces. Most tables (Not all) will be available for CMAs. Limited number of other tables will be available at other levels of geographies ie. Economic Regions, Cities (Urban Areas defined by Labour Force).

This annual product is a comprehensive database of Labour Force Survey estimates, containing thousands of cross-classified data series and spanning more than two decades, generally starting from 1976. Monthly and annual average series are available on a wide range of subjects, including labour force status by demographic, education and family characteristics; trends in the labour markets of metropolitan areas; economic regions; data by industry and occupation, wages and union membership; and much more. Labour Force Historical Review includes a wide range of subjects, including:

- labour force status by demographics
- education and family characteristics
- trends in the labour markets of metropolitan areas
- employment and unemployment levels by economic regions
- data by industry and occupation
- wages and union membership

11) INCOME TRENDS – “SURVEY OF LABOUR AND INCOME DYNAMICS (SLID)” (annual data – 2005 through to 2009) **by Census Metropolitan Area**

Commonly referred to as “SLID data”, this data includes cross-classified income tables. Tables include income distributions and inequality, earnings of men and women, income tax, government transfers, low income and sources of income.

12) CANADIAN CRIME STATISTICS (annual data – 2006 through to 2010)
by Canada, Census Metropolitan Area and City

Tables examine the characteristics of victims and the accused (their age and sex, the relationship of the accused to the victim, level of injury and weapon causing injury), as well as the criminal incident itself (location, target of violation, presence of weapons and type of property stolen).
