

Community Data Program

Enabling communities across Canada to measure and track local well-being

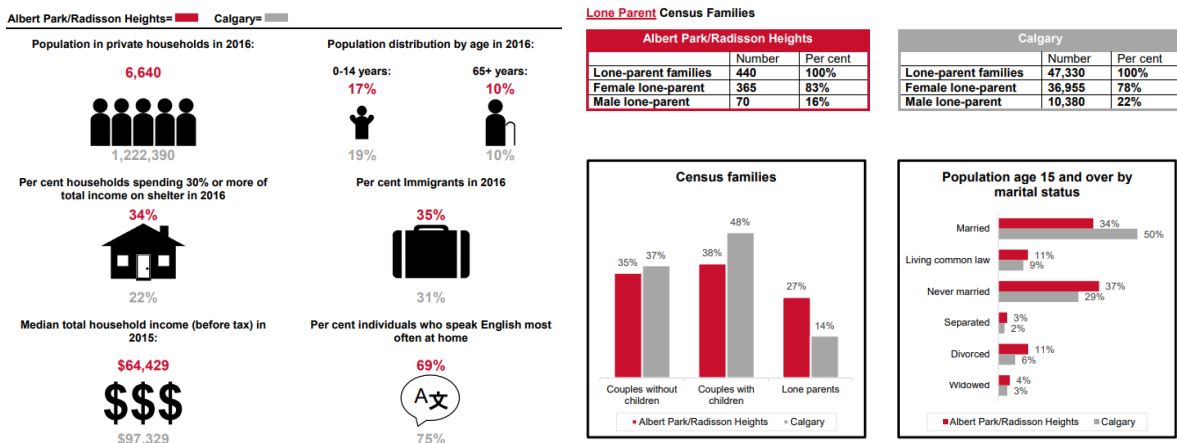

Community Snapshot

Calgary Community Social Statistic Profiles

Summary

Calgary's community profiles provide information about the population living in private households in each community from the 2016 Census of Canada. The Community Profiles contain demographic and household information from the 2016. The data in these profiles only includes the population living in private households (residents of collective dwellings such as health care facilities, shelters, and school residences are excluded).
